

Tips For Setting Up Your

HOME CLASSROOM

- 1.** Use a space that is clear of other objects like toys, food and drinks and away from other people and pets. A small space with privacy is ideal.
- 2.** Position the screen near a wall, so that students are facing away from other activities going on in the room.
- 3.** Position the screen at comfortable eye level to the student.
- 4.** Have the screen set up in a fixed position and make any position adjustments before class begins. The less the screen has to be handled during class, the better.
- 5.** Refrain from interacting with your student as much as possible during class.
